

# Pre-Kindergarten Math Games

## Look, Make and Fix!

### Materials:

7 of the same pattern blocks per player,  
1 sheet tagboard

### Goal:

To remember and replicate a pattern block construction

### Procedure:

1. Player 1 makes a construction using three pattern blocks to start.
2. Player 2 looks at the construction and duplicates it.
3. The roles are then reversed and the game continues, gradually adding more shapes.

### BONUS CHALLENGE:

1. Player 1 hides the construction using the sheet of tagboard.
2. Player 2 then builds from memory. (If they need help have the construction uncovered at first)
3. When the construction is completed, the tagboard sheet is removed and the construction is fixed to match the original exactly.
