

Pre-Kindergarten Math Games

Penguin Counting Game

Materials:

1 Die

2 Penguin Counting Mats

40 Colored Tiles

Goal:

To use one-to-one correspondence to cover the correct number of penguins.

How to Play:

1. Pass out a penguin counting mat to each player. Place tiles in the center of the table where they can be reached by all players.
2. The first player rolls the die. The number the player rolls is the number of penguins that the player covers with tiles. For example, a player rolling a 5 should cover 5 penguins with 1 tile each. Be sure to start at the green circle, and cover penguins from left to right, one row at a time.
3. Pass the die to the next player on your left.
4. Repeat until one person's card is completely covered.
5. The first person to cover all their penguins wins!!
