

INTERGOVERNMENTAL RELATIONS

From time to time, the school district will be notified by other agencies of government about proposed changes in the use or configuration of property that is in close proximity to school district buildings or grounds. Upon receipt of such notification, the administration will make such inquiries and meeting appearances as necessary to determine whether the proposed changes would in any way endanger the health or safety of students, staff or community members who use the school district property. The administration will report its findings to the Board who will determine the appropriate actions to take, if any, to protect the interests of the school district.

Policy Adopted: February 14, 2002
