

CONSULTANTS

The Board of Education recognizes there are circumstances in which the best interests of the district may be served by retaining the services of a consultant. Therefore, to facilitate the administration of the district, the Board of Education authorizes the Superintendent of Schools to retain the services of consultants, whenever he/she deems it necessary. The Superintendent may permit the expenditure to a maximum of \$5000 peruse for each each consultant so retained.

The Superintendent shall report to the Board, as a matter of information, each time a consultant is retained. Where the cost of services will exceed \$5000, specific authorization for such purpose will be required by the Board.
